for optimal sharpening results  
and easy use

**Sharpening Angles**  
30° Japanese edge  
40° European edge

**Diamond Grinding:** Recreates the knife edge.

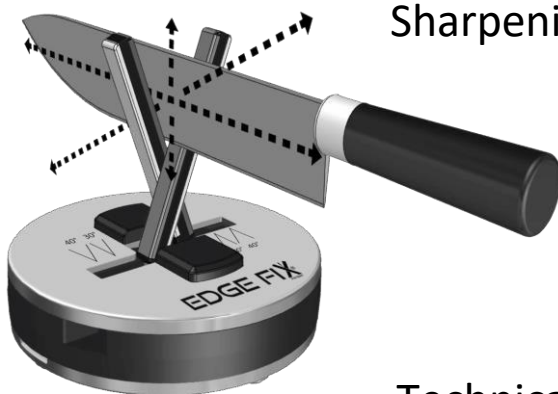

**Ceramic Honing/Polishing:** Maintenance for everyday use.

# Knife Sharpener for Manual Grinding and Honing/Polishing

Self Adjusting Function SAF  for optimal sharpening results

The EDGE FIX knife sharpener is equipped with a new unique sharpening system called SAF (Patent).

Due to the spring-loaded diamond/ceramic coated rotatable rods, the knife edge always has full contact with the grinding and polishing surfaces – in all directions of movement. The rods combined with the SAF optimize the contact area, thus creating the best sharpening results.

## Sharpening Information

### Optimal Sharpening

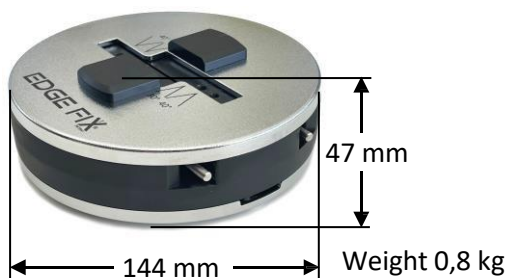

Add water to the blade.

Move the knife ← Forward → Backwards

↓ Down ↑ Up

Repeat movements for optimal results.

## Technical Information

## Specification

Diamond surface:  
900 mm<sup>2</sup>  
Diamond size:  
46 μ

Ceramic surface:  
900 mm<sup>2</sup>  
Ceramic surface:  
0,6 Ra
